

DIDSBURY PIONEER

VOL. XXXV, No. 26

DIDSBURY, ALBERTA, THURSDAY, JUNE 30, 1938

\$2.00 per Year. 5 Cents a Copy

"THE will of the people must prevail" has been the theme of many a radio address by the premier of the province. It is apparent, however, that this does not apply to Didsbury.

A petition of 960 electors, signed in a territory which at the last election cast 1,060 votes, was presented to Premier Aberhart, asking that the highway be brought to the edge of the town. A promise was received that the engineers would be asked to survey the road along the edge of town and continuing south.

What appeared to us to be a very sketchy survey was made, and then the work of moving fences and power lines was resumed on the former survey. No word was received, however, by the petitioners' committee as to the intentions of the government.

Mayor Chambers finally wired the premier, asking for the decision. Then came the reply last Thursday:

"Engineers maintain suggestion is impractical. Special entrance is being provided."

Many men well acquainted with road building are of the opinion that the road near town is more feasible than the road two miles out. However, "the engineers' will must prevail."

Discuss Rural Assessments.

A meeting of municipal district councillors and assessors, together with the Provincial Director of Assessments, was held in Didsbury on Friday last.

The municipalities of Norquay, Rosebud, Beaver Dam, Ghost Pine, Stauffer, Waterloo, Westerdale and Mountain View were represented. Mr. Alex McNaughton, secretary of Westerdale M.D. 311, occupied the chair.

Mr. J. W. Judge, director of assessments, in addressing the meeting, pointed out that the assessment being made this year would be a permanent assessment and that the assessment would not be made triennially as in the past. Any future assessment would be made on the order of the minister of municipal affairs.

He also stated that this assessment would be the only one made with regard to rural lands and that when the assessment came into effect in 1940, the town school districts would be required to adopt the assessments made by the municipal districts.

The director of assessments pointed out the importance of having the assessment equalized with that of the adjoining municipalities, and the following basic rates of assessment were suggested:

No. 1 Arable Land	\$20.00 an acre
" 2 "	18.00 "
" 3 "	15.00 "
" 4 "	12.00 "

Hay Land \$13.00 and \$10.00 acre
Pasture Land \$10.00, \$7.00 and \$5.00 an acre.

An addition of 12 per cent will be added to lands within half-a-mile of a school, with the rate decreasing 2 per cent for each half-mile further away from a school.

Deductions of from half to 1 per cent will be made for each mile that the land is distant from a shipping point.

The assessment when approved by the Department will be adopted from year to year by the councils, and the taxpayer will have the right to appeal against the assessment annually.

Table Cream Shippers Reorganize Association

The shippers of table cream from the Didsbury district met Saturday to reorganize the Didsbury Table Cream Shippers' Association.

The following officers were elected:

President, Tom Collinge
Vice-President, Carlton Leeson
Sec.-Treas., E. K. Cullen
Executive: W. Thurlow, H. Hansen, A. C. Wahl and J. M. Allen

The president (T. Collinge) and J. M. Allen were appointed to attend the milk enquiry which was held at Calgary on Tuesday.

An effort is being made to organize with other districts shipping table cream to the city of Calgary into the Calgary and District Table Cream Shippers' Association, of which the local organization will be a branch.

Golf Club Notes.

The cup competition commences July 1st. All those who have not handed in their cards for the last competition will do so at once, so this handicap can be fixed.

Horse Racing Big Feature Of the Fair

The Didsbury Racehorse Association, which was recently organized, will hold its meet in conjunction with the Didsbury Fair on Wednesday, July 20th, and will put on the biggest program that has appeared on Didsbury Race Track for years.

The prize list has been augmented and the amount of prize money offered is now large enough to attract outside horses of the better class. The managers of the meet are assured of full entries in each of the classes and there will be a full afternoon of racing.

Following are the events:

2 25 Harness Race	\$125 00
2 30 Harness Race	100 00
1/2 Mile Open Run	25 00
14 3 & Under Open Run	25 00

There will be an entry fee of 4 per cent of purse for each race.

Junior Grain Club Organizes

The Didsbury Junior Grain Club held a meeting on Wednesday, June 22nd and elected officers for the year.

Nineteen boys have joined the club this year, and all have sown plots of wheat which will be field inspected in the latter part of July.

Mr. Hugh McPhail of Olds, who has charge of the club work was present and gave the boys an interesting talk.

It was decided that the club should attend the field day which will be held during July at Howard Wright's seed farm at Airdrie. All boys' clubs in the Calgary area will meet at that time.

The following officers were elected: president, John Bruce; vice president, Leslie Evans; secretary, Charles Kohut.

A Vacation Bet

Percy Lunt and Oliver Goodfellow are planning a vacation to Hunter Valley. From here they intend to hitch-hike to Lake Minnewanka, a 60 mile jaunt. They will travel light—no tent, one blanket each, salt, baking powder, flour and bacon. This vacation is to settle a bet. They say they can make the round trip from Hunter valley in four days. Carrying tobacco and \$1.50 in cash is a condition of the bet.

Burglars Crack Creamery Safe

The safe at the Didsbury Creamery was blown open Monday night and the contents looted.

The robbery was discovered by the buttermaker, Mr. G. M. Durant, when he went to work at about 5 a.m. Tuesday.

Entrance was made through the rear window of the office and the robbers blew the lock off the safe, the dial flying through the front window.

Besides taking considerable cash, the thieves took away a large number of cancelled cheques, which will cause the office force considerable inconvenience. The R.C.M.P. are investigating.

Will Protest Against Taxation of Banks

A meeting of citizens is being called for Tuesday, July 5th, at 8 p.m. in C. E. Reiber's office to protest against the unfair taxation of the banks in Alberta.

Protest petitions have been passed by boards of trade throughout the province, in reply to which the legislators claimed that they came from minority groups.

At a meeting held recently in Acme it was decided to circulate a petition throughout the Didsbury constituency, protesting against the heavy taxation that has been put on the banks. At the meeting called for Tuesday the best method of circulating the petition will be considered.

The petition asks that the Government of Alberta repeal the Bank Corporations Temporary Additional Taxation Act 1938, and to refrain from further additionally taxing the chartered banks within the province until improved conditions warrant same.

Going on a vacation? If so, buy your travelling bags from T. E. Scott.

More Special Prizes For Didsbury Fair

In addition to the large list of special prizes which have been listed in the prize list, the following have been added:

O. Carleton

Light horses.—Best colt born in 1937 or 1938—\$5.00

W. J. Fulkerth & Sons

Draft Horses.—Get of sire, 3 colts, 3 yrs. and under.—\$5.00

Should Not Feed Treated Wheat

The following letter from the department of field crops, University of Alberta, has been received by Mr. M. Weber of the Rosebud Flour Mills, regarding feeding and milling of treated grain:

Dear Sir:

I have your enquiry as to the milling value of treated grain. The duets, Ceresan and Leytosan, sold for treating seed grain, contain an organic mercury compound as the effective principle, and are consequently highly poisonous. In an experiment to determine the value of treated grain for hog feeding we found that the animals at first failed to make normal gains, later developed crippling symptoms and finally died at the end of a six-week period. While these duets are confined to the outer portion of whole grain, they could not fail to be mixed with the flour during the milling process and consequently would result in its poisoning. In addition to this fact, it would be extremely difficult to clean the rolls and sieves and would result in the contamination of following untreated grain.

Formaldehyde is more volatile, and grain treated with it may safely be fed to livestock after sufficient time has elapsed for it to evaporate completely, but it should not be used for milling flour.

Yours very truly,

R. A. Ludwig,

Graduate Assistant.

The Curse Of Education

"The best things in life are not given a percentage."

The foregoing is just a small extract from a speech made to a class of graduating Normal School students by Dr. J. S. Thomson, president of the University of Saskatchewan, to give point to a protest which he uttered against the school system of examinations as it exists in Canada and which he appropriately described as "a curse".

It is indeed gratifying to find leaders of education in the Western provinces voicing such a viewpoint on the inelastic method of categorizing school students—of pigeon-holing them under valuations elicited as a result of the application of a rule-of-thumb system of examinations.

As Dr. Thomson said: The grading of A's, B's and C's, and this multiplication of credits until students don't know where they are, "leaves so little place for all the noble things in life that can never be put in terms of percentage."

While the press report of Dr. Thomson's address did not enumerate those nobler things towards which the student mind should be guided, it is not difficult to enunciate them and they can all be incorporated in the single-term "good citizenship", provided the definition of that phrase is made to include all that it should designate.

Good Citizenship

And good citizenship means much more than interest in government, in community affairs, in neighborhood welfare and the like. It involves the development of good sportsmanship, unselfish interest in the welfare of others and the will to recognize and place human values above material considerations and the advancement of moral and spiritual welfare.

It is because these things are, and should be, the ultimate goal of the educational system that the personality and character of the teacher should be the ranking qualification; for, as the teacher is, and not as the teacher says, so will the pupil be during the formative years of the child's career. The teacher is destined to implant an unconscious and ineradicable mark on the mind of the impressionable youth under his or her care.

The value of the teacher to the children, to the community and the nation should be measured in terms of character and integrity rather than in brilliance of erudition. A teacher of strong individuality and mediocre academic attainments is worth immeasurably more to the future generation than one who is superlatively clever but lacks the attributes which inspire respect and admiration. The teacher who combines both is a jewel indeed and for such, adequate compensation cannot be measured in dollars and cents.

In the tuition of those things which as Dr. Thomson says, cannot be registered in percentages, an ounce of practice is worth a ton of precept, to paraphrase a time-honored saying. The teacher who renders only lip service to the nobler things of life is not worth his or her salt when the yardstick of real values is applied, but the teacher who is a living example of the aspirations which he or she holds up to the pupils as the lode star of their careers is a pearl of great price.

While the teacher may have to conform, through regulatory control, to the examination system in greater or less degree, he or she will perform his or her greatest and most valuable work when moulding children into future citizens with ambitions to reach for the highest and best that life can give, not in material terms, but in the moral and spiritual realms, and this can only be done by the influence of example.

A Permanent Influence

The teacher who plays the game of life on the basis of the highest rules will exert an unconscious influence for good on his or her charges that will never be extinguished throughout life, and fortunate, indeed, is the child whose future destiny is placed in such competent and reliable hands.

Nor will that impelling force die with the passing of the teachers' charges. It will be passed on from generation to generation. Like the ripple made in the water by the cast stone or the impulse surging through the ether from a radio transmitter, no one may say how far it will go or measure the extent of its ultimate effect.

The teachers about to embark on their difficult and highly responsible task of laying the foundation for a new and better nationhood were urged by Dr. Thomson to set before themselves three standards, or, as he called them, "attitudes of life": the absolute worth of the individual human being, the building of character and the value of citizenship, and pointed out the importance of selflessness with the appropriate comment that "the way to be unhappy is to fall in love with yourself."

Excellent advice which, if it falls on receptive ground, is bound to yield rich dividends to the country in the future.

Her Mistake

An Orchard street resident of Brockville, Ont., politely declined the offer when a small boy and girl knocked at her door offering tulips for sale. She said she had tulips for her own in the garden. But she had not. When she went into the garden a few minutes later she found they were gone.

Farmers in California are being taught by agricultural extension workers how to make simple air cooling equipment for their homes.

One Honest Firm

The professor had called at nine shops in town for his lost walking-stick and had found it in the tenth. "Thank you so much indeed," he beamed, as he took possession of it. "Do you know, this must be one of the few honest places in town? I've called at nine shops already and in each I was told that they hadn't got it."

Aversion to using their hands for carrying anything is so strong among the native women of Paramaribo, Dutch Guiana, that they even put letters on their heads, weighing them down with a brick.

A new ordinance map of the county of Surrey, England, with a scale of 25 inches to the mile, shows every building more than 10 feet square.

Not Good Publicity

Successes In Canada Not Stressed
As Much As Failures

"Canada," said Lord Tweedsmuir to the visiting Scottish farmers the other day, "gets rotten publicity: too much for the failures and too little for the successes." There is much truth in that remark, states the Ottawa Journal.

The world hears about our Western drought, the problem of our railways, but much less about our solid accomplishments. Perhaps the world does not realize that this small population in half a century has made a nation out of scattered settlements, has made a good start in the development of rich natural resources, is one of the foremost trading countries on earth. Sometimes in the face of immediate difficulties we fail to bear these facts in mind even among ourselves.

The trouble is that our accomplishments go into the blue books, but our difficulties are news, and our successes are not sufficiently understood abroad. Perhaps it isn't news, but it is a fact of first importance that alongside an English-speaking nation of 130 millions we have preserved and developed a British country, solidly devoted to the British tradition. The progress of agriculture, of industry, of mining may not be news, as drought is news, but that progress has been a vital factor in world history of the past half century.

There isn't much we can do in the matter, of course. We shall just have to carry on in the knowledge that even in the United States many people still believe Canada a place of perpetual ice and snow inhabited mainly by Eskimo and Mounted Police, but we need have no inferiority complex on that account.

Prime Ministers

Sixteen Ministries And Eleven Premiers In Canada Since Confederation

During the 71 years since Confederation there have been 16 Ministries and there have been 11 Prime Ministers in Canada. In the 34 years, up to 1901, there were seven Prime Ministers and in the 37 since then only four have been added to the list says "Canada's Weekly."

The most frequent changes in Premiership came after the death of Sir John A. Macdonald in 1891. Between that year and 1896 there were five new Prime Ministers—Sir John Abbott, Sir John Thompson, Sir Mackenzie Bowell, Sir Charles Tupper and Sir Wilfrid Laurier.

Sir John Macdonald was leader of the government for about 19 years, the longest period, but Sir Wilfrid Laurier, leader for 15 years, had the longest unbroken term. Sir Charles Tupper had the shortest term, only two months and one week. Sir Robert Borden was in office for eight years and 10 months. Mr. Mackenzie King, the present head of the government, has been Prime Minister for about 11 years.

All Mr. Meighen's predecessors, except Alexander Mackenzie, were given titles. Sir Charles Tupper received a baronetcy. The widow of Sir John Macdonald was created a baroness. Messrs. Arthur Meighen, W. L. Mackenzie King and R. B. Bennett have remained untitled.

Made To Order

Research Engineer Explains How Synthetic Moonlight Is Produced.

Synthetic moonlight which can be produced in the parlor by the flick of a switch appeared as a great boon for love making.

Aubrey E. Noble of Buffalo, research engineer in gas tube lighting, explained it's all done with gas tube lighting. Silvery-blue rays of moonlight are produced by switching off all the colors except blue in synthetic daylight.

Synthetic daylight has been used with success by florists in New York.

For housewives who like color in their home the engineers have worked out a plan which combines the use of a mercury lamp with fluorescent crystal paint. The walls are painted with fluorescent crystals and rays from the invisible lamp give a brilliant colored effect.

A baker has written his will on a biscuit. It is to be hoped that after the lawyers have had their nibble there will be a few crumbs left for the legatees.

SELECTED RECIPES

LIGHTNING LAYER CAKE (Two Eggs)

3 cups sifted Swans Down Cake Flour
3 teaspoons Calumet Baking Powder
1/4 teaspoon salt
1 1/2 cups sugar
3/4 cup softened butter or other shortening
2 eggs, well beaten
1 cup milk
1 teaspoon vanilla
Sift flour once, measure, add baking powder, salt, and sugar, and sift together three times. Add butter. Combine eggs, milk, and vanilla, and add to flour mixture, stirring until all flour is dampened. Then beat vigorously one minute. Bake in two greased 9-inch layer pans in moderate oven (375 degrees F.) 25 minutes. Spread Soft Mocha Frosting between layer and on top of cake.

Soft Mocha Frosting

4 tablespoons butter
4 1/2 tablespoons strong coffee
3 cups sifted confectioners' sugar
Dash of salt
1 teaspoon vanilla.
Add butter to coffee and heat just to boiling. At once pour over sugar, stirring until sugar is dissolved. Add salt and vanilla. Beat until smooth and of right consistency to spread. Makes enough frosting to cover tops of two 9-inch layers, tops and sides of two 8-inch layers, or top and sides of 8 x 8 x 2-inch cake.

Yields Another Treasure

Paris Wrecking Crews Find More Gold Coins In House

The old house at 53 Rue Mouffetard, Paris, where wrecking crews found a \$90,000 treasure in gold Louis, has yielded another and richer hidden hoard.

Workmen broke down a new section of wall and brought to light a leather and cloth bag packed with ancient gold pieces. Although an estimate of the worth of the new find was not immediately available, officials said it was greater than \$90,000.

The currency found first had been willed by Louis Nivelle, King Louis' equerry, to his niece, Anne Louise Claude Nivelle, according to the testamentary document found then.

In Sequoia national park, a chipmunk was declared "champion nut-gatherer" after it had stored 88 nuts in its cheeks at one time.

No matter how low a man may fall, he can still find a dog and a woman to love him—and usually does.

Big Peace Parade

The Hague Saw 10,000 Women March In Silent Demonstration

More than 10,000 Netherlands women from all over the country marched in a peace procession through The Hague, while deputations were received by the Netherlands Government, the municipality of The Hague, and the World Court in the Peace Palace.

This fifth women's peace procession, marching in silence, was a moving expression of women's desire for peace and their general abhorrence of war and violence. It was a reply of Netherlands women to the call issued recently by the Central Committee of the Women's Peace Procession in the Netherlands, addressed to all "women, wives and mothers."

"Let us all," the call said, "on Goodwill Day, give in public a silent testimony of our unweakened longing for peace. Join the ranks of those who know that they are moved by sympathy with the numberless innocent people who in the past year, in Europe as well as in other parts of the world, fell victims to the force of arms."

Similar women's peace demonstrations were also held in Switzerland, France and Scotland.

Hotel Guest: "Is there an Encyclopedia Britannica in the hotel?" Clerk (with polite attention and regret): "There is not, sir; but what is it you wish to know?"

The Monarch butterfly takes migratory journeys, and is said to be capable of a 2,000-mile flight.

Fine Results Of Agricultural Endeavor by Old and Young Seen At Canadian Fairs

Despite the lure of fun and frolic, the Canadian agricultural fair—even the great all-Canada Royal Winter Fair at Toronto—has remained typically Canadian. Earnestness is its dominating note. This fine Canadian quality dates from the days of the pioneers in whom earnestness became a second nature in their unbroken resolve to conquer the many difficulties surrounding them. Even in the matter of relaxation, earnestness prevailed, for to attend the early agricultural fair, the hazards of travel were often enough to make the stoutest heart quail. But the fairs were held nevertheless, spreading westward from Lower Canada, through Nova Scotia to Upper Canada and onwards by Manitoba to the Pacific Coast.

Fun there may be at the agricultural fair, but it is relegated to a secondary place in the work which has to be done. Work, and good work at that, is predominant. Thus, slowly but surely, this Canadian trait of earnestness has forged a link in the chain towards the solidarity of the Dominion and the agricultural fair may serve as an example for the welding of the many parts of Canada into one whole.

It was when youth came into the field that this movement was more readily discernible. With the inherited earnestness from the older generation, Canadian youth, as principally represented in an organized way by the Canadian Council on Boys' and Girls' Club Work, prepared itself seriously to fashion the complete farmer. From the home localities, the movement spread to provincial importance, and from provincial importance to inter-provincial recognition, from which it swept to Dominion-wide prominence with the now famous contests at the Royal Winter Fair at Toronto, where provincial differences are submerged and the honour of Canadian agriculture as a whole is the primary consideration.

The present-day fine results of agricultural endeavour on the part of both old and young at the agricultural fairs and exhibitions throughout Canada are a far cry to the days when Intendant Talon in 1672 boasted that he had Canadian fabrics wherewith to clothe himself from head to foot or from the earlier days when the agricultural fairs at Tadoussac, (where the first horse was introduced into Canada in 1647) at Three Rivers, Montreal, and Quebec were considered tremendous with their barter of peas, hemp, fresh and dried cod, salted salmon, eels, seal and porpoise oil, clapboards and planks, drugget, bolting cloth, cloth made from nettles and serge, leather and furs.

This year, 1928, the Windsor Fair, Nova Scotia, celebrates its 173rd anniversary, while Pictou Fair in the same province will be 121 years old. One hundred and forty-six years ago, in Upper Canada the first agricultural society, with accompanying fair, to be recorded was the Niagara Agricultural Society. Later many agricultural societies were established in Upper Canada, and when Lord Elgin, whose hobby was the establishment of agricultural associations, visited Upper Canada, he found a people after his own heart. Lord Elgin was Governor-General of Canada from 1847 to 1854 and never ceased emphasizing the value of agricultural associations for the purpose of studying scientific methods of husbandry. Before coming to Canada, he was Governor of Jamaica where he founded numerous agricultural associations as the best means of developing the resources of the land.

For nearly a century and a half, particularly after Confederation, the various governments have identified themselves closely with agricultural fairs and exhibitions, affording both monetary and practical assistance. The Dominion and Provincial Governments for some years past have made yearly grants, and officers of the Departments of Agriculture have given personal assistance in bringing the various fairs and exhibitions to a successful issue. Grants to fairs and exhibitions through the Dominion Department of Agriculture for the 1937-38 year were made to 18 Class

"A" exhibitions, to 13 winter and spring shows including the Royal Winter Fair, Toronto, and to 44 Class "B" fairs throughout Canada for judges', Boys' and Girls' Club Work, and prize lists. The amount expended was \$299,319.17.

Lip Reading Troubles

Winnipeg Delegate Says People Of Toronto Are The Worst In Canada

Toronto residents are just a pain in the ear-trumpet to lip-readers. Mrs. G. H. Stewart, of Winnipeg, who attended the convention of the Canadian Federation of Lip-reading, of which she is president, declared that for lip-reading purposes Torontonians rank with people with walrus moustaches, people with loose false teeth and other stumbling blocks.

Mrs. Stewart is a kindly woman but she unburdened herself to a Toronto reporter on the handicaps that confront lip-readers. "People with moustaches are the worst, because you can't read lips if you can't see them," she said.

"Englishmen are an awful nuisance too. They think it's dignified to keep a stiff upper lip, which may be swell for dignity but doesn't help lip-readers at all." She declared lip-readers won't go to see English pictures. The sound effects are no good to deaf people anyway and when they can't read the lips of the actors they are totally out of luck.

"But the people of Toronto are the worst in Canada. Do they ever come right out and say 'Toronto'? No! They say 'T'rona' or something like that, and it doesn't look like anything but a pout to the lip-reader."

A Fast Journey

Bottle Dropped In Mid-Atlantic Was Picked Up In Norway

Making one of the fastest journeys known to its sender, a bottle, containing a message, dropped in mid-Atlantic last July was picked up in Norway and has been returned to its sender, Sam Simpson, 243 Madison street, St. James, Winnipeg, it was learned.

Signed by 11 members of the Cutty Sark Club and Mr. Simpson, the message and bottle was given to a friend, George Moore, 510 Carlaw avenue, who was going on a visit to Scotland.

Expecting to hear no word of his experiment for several years, Mr. Simpson was surprised when he received a letter from Dr. F. Fossum, of Leka, Norway, telling him the bottle had been picked up in April by a local fisherman, Martin Olufsen.—Winnipeg Free Press.

According To The Judge

Tomato In Ordinary Use Is Vegetable And Not A Fruit

Ruling that in the ordinary usage, a tomato is called a vegetable and not a fruit, City Magistrate Donald Menzies dismissed a charge against Samuel Fieldstone, of London, Ont., of selling fruit on a restricted street. Fieldstone was selling tomatoes on a truck on King street about a month ago, and was charged by city police with selling fruit in a restricted area. The defence backed their entire position upon the claim that tomatoes are not a fruit but a vegetable.

New Style Of Camera

Slant-Eye Camera Used To Measure Mountains From The Air

An invention of a "slant-eyed" camera which measures mountains from the air was reported by the American Geographical Society. Used by flying cameramen, it takes all its pictures at a tilted angle instead of straight down. It has shown, among other things, that reports of a chain of mountains in Northern Labrador higher than the mile-tall summits of New Hampshire's Mount Washington and North Carolina's Mount Mitchell are untrue.

A woman who loves money does not necessarily love the man who has it.

Survey Of Crops

Federal Department Of Agriculture Sending Out Schedules To Farmers

In June of each year, the Dominion Bureau of Statistics, in co-operation with the Provincial Departments of Agriculture, distributes cardboard schedules to farmers for the purpose of collecting statistics of acreage under crop and the numbers of live stock and poultry on farms. An innovation of 1931 extended this survey to cover the breeding and marketing intentions with regard to live stock. In all of the provinces, except Prince Edward Island, Nova Scotia, Alberta and British Columbia, these schedules are distributed to the farmers through the rural school teachers. In these four provinces, the cards are mailed direct to the farmers.

The acreages of field crops, in particular, are the real foundation of our scheme of agricultural production statistics. Only slightly less important in our national planning is the necessity of having correct knowledge of the numbers of live stock on farms. The accuracy of our compilations in both these classes is largely dependent upon the obtaining of completed cards from a fair sample of the total number of Canadian farms.

We would emphasize the value of these surveys and the importance of a sufficient response by the rural population.

Take Many Chances

Swimmers Have To Decide Safest Action In Emergency

The story of a drowning in Little Long Lac is that one man, unable to swim, clung to an overturned boat and was able to reach shore while his companion, a good swimmer, set out to swim to shore and failed to reach it. There have been many similar instances. A knowledge of how to swim is valuable and, no doubt, has enabled many to save themselves, says the Port Arthur News-Chronicle, but, quite frequently, it has prompted people to take chances which have in the end proved fatal. Difficulty would be in setting any rule for guidance as between holding to an overturned craft and attempting to swim. Circumstances, which are different, govern in each case.

Canadian Missionaries

Escape From City In Honan Province In Time To Miss Jap Bombardment

Canadian missionaries escaped from Kwei-teh just before an intensive Japanese artillery bombardment, the British Consulate was informed. The attack virtually levelled the city (the reports said, and forced the Chinese defenders to withdraw.

Missionaries who left Kwei-teh, in Honan province, for Kaifeng, farther west along the Lunghai railroad, included Miss K. Robbins, of Vancouver, B.C.; Dr. H. H. Gilbert, London, Ont.; and Anne Burgess, an Australian nurse attached to the Canadian mission.

Mary, Queen of Scots, became a queen at the age of one week.

Federal Activities Cover Wider Scope Than Any Other Business Organization

A Toronto finance paper quotes Deputy Minister of Finance W. C. Clark as giving to a gathering of professors, economists and laymen the following facts:

Dominion Government activities cover a wider scope and show a greater variety than those of any other Canadian business or organization.

Employees, including regular and fluctuating staffs, number about 65,000, of whom 43,000 are scattered throughout the country.

Its payroll exceeds \$77 millions annually.

Annual revenue is more than half a billion dollars.

Total cash turnover is more than \$1.5 billions.

It annually receives some 675,000 bank drafts for some \$700 millions.

It issues almost four million cheques a year.

It pays \$45 millions in pensions to some 95,000 persons.

It redeems yearly some 4,300,000 interest coupons.

On the average working day it sells 70,000 money orders and postal notes.

It buys, refines and sells in the world markets practically the entire output of Canada's gold mines.

During the past five years, the Dominion Treasury has floated for new cash needs and refunding in Canada, London and New York securities totalling more than \$2,250 millions, not including guaranteed C.N.R. obligations, which would add another \$235 millions. These figures also exclude the \$25 millions to \$30 millions of Treasury bills sold every fortnight to redeem maturing issues.

All of which tells what? Simply that running Canada is big business—the biggest business in the country. Also that this business, which belongs to all of us, in which each one of us is a shareholder, deserves more thought from all of us than it usually gets.

Too many of us look upon the government, upon the State, as something remote from our lives. When we think of it, we think of it in terms of taxes, with the thought usually expressed in terms of complaint. More than that, and worse, we seldom associate taxes with things we demand from government—favours which, in a vague way, we imagine to come from a government which must have wealth or money of its own.

Governments have no money of their own; they cannot put a cent into our pockets that they don't first take out of our pockets. The more we demand from them, the more they must take from us. That is what high taxes mean.

And there is something else. This: that the success or failure of this big business of running Canada is related directly and absolutely to the intelligent and just interest which we take in it—or fail to take in it.

Most of us, unfortunately, take

precious little interest in it. We grumble about taxes; we seldom ask ourselves why taxes are high; just as seldom ask ourselves what might be done, or left undone, to make taxes lower.

Some of us, thinking ourselves superior to the common herd, hold aloof from politics. We think ourselves too good, or perhaps too important or too busy, to go to a political gathering, to attend a political convention, to bother about helping to nominate or elect good representatives for our Legislatures or our Parliaments. Often we pride ourselves on not "belonging to a party." "Politicians" are scorned.

All this, in a democracy, is bad citizenship. And bad business. We are just not pulling our weight in the boat. Responsibility is being shirked; citizenship betrayed; Canada let down.

The time is coming, we are convinced, when citizens of a democracy like Canada, if they wish to avoid grave trouble, must shake themselves out of this complacency and lethargy. Democracy has no right to expect success as a tribute from fate. It must win, as other institutions must win, in competition with rival institutions: with totalitarianism, Fascism, Communism. Unless those who champion it or profess to believe in it can show the same faith and enthusiasm that disciples of Fascism and Communism show, it is bound to go down.—Ottawa Journal.

Shepherd Dogs Are Loyal

Leading Of Blind Not Only Thing They Do Well

The recent death of Buddy, first of the "Seeing Eye" dogs trained in this country, touched a soft spot in many editorial hearts.

The New York Times, usually unsentimental, was not content to extol her long and faithful service to her blind master.

The Times went on to say of the experience with Buddy and the other German Shepherds which have been trained to "see" for the blind:

"It has gone far to refute widespread calumnies on a splendid breed of dogs: unfounded gossip of 'wolf blood' and equally unfounded slander of treachery and viciousness on the part of the Shepherd. As a matter of fact no breed has a longer or more varied record of loyal work for man as tender of flocks and herds, as guardian of the household, as police dogs, as courier and as untiring worker in the first-aid service in war. The leading of the blind is but the most touching and beautiful of its many utilities."

And so Buddy, who died the other day of ailments brought on by age, served not only man, but also her own kind.—Detroit Free Press.

Map Of B.C.

Proposed Scale Map Would Take Long Time To Complete

British Columbia's proposal that the Dominion map that whole province in scale of one mile to an inch would take 211 years to accomplish at the present rate of progress, Dr. Charles Cammell, Deputy Minister of Mines and Resources, said. The work would take \$14,000,000 to complete, of which \$10,000,000 would be contributed by the Dominion, under the province's plan, he commented as the suggestion was raised before the Rowell Commission. The department had only a limited number of army planes at its disposal, he explained.

Name And Fame

Near Digby, N.S., is the little village of Groeses Coques. And if anyone should ask you what about it, you might reply that it lays claim to having the largest clams in the world. That is no recent boast, says the Canadian Magazine, for it had them back in the Acadian days, and hence its name, which, literally translated, means "large clams."

Contact between each of the four tires on your car and the street represents a space about the size of the palm of your hand. This emphasizes the importance of good tires and good brakes.

Simple Stitchery Makes Gay Sampler

PATTERN 6128

Want some color interest for your room? Then embroider this cheery sampler. It is in easy cross stitch with the flowers in other simple stitches. Pattern 6128 contains a transfer pattern of a panel 11 1/4 x 15 inches; color chart and key; materials needed; illustrations of stitches.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

The World of Wheat

By H. G. L. STRANGE

Director "Crop Testing Plan"

"Seed time and harvest—shall not cease," the Bible tells us.

In this good Book are found a surprising number of maxims and precepts about agriculture, setting forth the advantages of the use of good seed, of proper cultivation of the soil, of keeping weeds down and so forth. In fact it is not too much to say that if a farmer today were to operate according to the many injunctions given in the Bible, that he would simply be carrying out the advice given by the most modern agricultural authorities—and yet these biblical injunctions were written thousands of years ago.

This year, 1938, is the four hundredth anniversary of the first printing of the Great English Bible, which took place in 1538. This was the first complete Bible in the English language that was authorized by ecclesiastical authorities for use in English churches, and it was only displaced in 1610 by that very marvellous of English literature the revised King James or Authorized Version as we have it today.

No doubt when the promise was made to us in Genesis that "Seed time and harvest shall not cease," it was based upon the assumption that farmers would carry out the good agricultural practices as advised in the ancient and good Books.

Following factors have tended to raise price: Rust spreading in the United States and injury apparent in threshing returns; frost damage greater than expected -- More precipitation needed over Canadian and American spring wheat belts -- Bread shortage becoming more apparent in Italy -- Very dry conditions in important central Volga section -- Lack of adequate rainfall affects Danubian spring crops.

Following factors have tended to lower price: European crops may be slightly larger than in 1937 -- Russia offering new crop wheat, barley and rye -- Argentine weather continues favorable for new crops -- India making substantial wheat shipments -- Argentine wheat estimate larger than last year -- Manchuria plans to increase soybean production.

Searle Precipitation Report No. 4

Combining the precipitation that occurred last autumn during the months of August, September and October, and the rains which have fallen this year from April 1st to June 18th, inclusive, and weighting for wheat acreage, the moisture condition in Alberta on June 18th was 92 per cent of normal as compared with 97 per cent for the previous week, and 98 per cent for the week before that.

For Saskatchewan, on June 18th, the condition was 86 per cent as compared with 89 per cent for the previous week, and 84 per cent for the week before that.

For Manitoba, on June 18th, the condition was 84 per cent as compared with 87 per cent for the previous week, and 86 per cent for the week before that.

Westcott Notes

Westcott W I held its June meeting at the home of Mrs H Steckley on Thursday last. Mrs Befus took the topic, "Handicrafts," and gave an account of the origin and history of Quilting, which was very interesting. She also showed samples of wool dyed with dyes made from local plants. Following a report of the constituency conference, the meeting voted a donation to the Radium Fund. Miss Hazel Ray, whose marriage takes place shortly, was presented with a silver berry spoon. This Institute is sending two members to the Farm Women's Week at Olds, and is also planning for a short course to be held the beginning of August.

Notes From the West

Mr. and Mrs. E. Fisher and Mr. and Mrs. F. Byrt were Banff visitors for the weekend.

Mrs Davidson of Bergen was the guest last week of her daughter, Mrs G. Byrt.

Mr. and Mrs. Monck and family of Calgary were weekend visitors with the latter's parents, Mr. and Mrs. W. Blain.

Two games of softball were played at the South Ford on Sunday, Elkton winning from Zella, and Elkton leading by quite a margin from Fallen Timber when rain stopped the game. Among the spectators were Mr and Mrs. Dave "Sweeney" Schiener of Calgary.

"Palm" Ice Cream

Taking the three prairie provinces as a unit, the weighted average on June 18th was 88 per cent of normal, as compared with 90 per cent at the same time last week, and 89 per cent for the week before that.

The use of moisture by the young plant up to this stage of its growth is comparatively small. From now on, however, the moisture utilization increases rapidly. Due to this fact, however, the importance of the moisture situation is accentuated at this time.

This Big Customer

HAS A
HUGE APPETITE FOR WESTERN PRODUCE

THIS man is a composite of many thousands of Eastern industrial workers. He's a husky fellow and he burns up plenty of energy when he's busy.

It takes lots of Western food to keep him going. But when he's idle he goes off his feed so badly that even Western produce cannot tempt him.

Which is just another way of saying that an active industrial East — typified by the Automotive Industry and the industries that supply its parts and raw materials — is vital to the well-being and prosperity of the agricultural West.

More than 6,000,000 lbs. of poultry; over 50,000,000 eggs; over 20,000,000 lbs. of butter and meats, live and dressed, to the value of over \$15,000,000, were bought from the West last year by Eastern industrial payrolls. Your purchase of a Canadian-built car helps keep these payrolls active — and brings your good money back West again.

AUTOMOTIVE INDUSTRIES

For statistical and further information about this industry, write to Automotive Industries, 1006 Lumsden Building, Toronto.

Calgary's Famous Stampede to be Held July 11th to 16th

Rated as one of the most spectacular and colorful shows of its kind on the Continent, the **CALGARY EXHIBITION AND STAMPEDE** will open its 53rd annual event Monday, July 11th, and continuing to Saturday, July 16th, with an extra day's races Saturday, July 9th. This world-famous Western show annually attracts well over 200,000 people from all over Canada and the United States. This year's program is destined to outshine all other previous shows, both in entertainment and educational value.

Mammoth Parade

Monday morning, July 11th, the mammoth parade swings down the streets of Calgary. This year IT'S BIGGER and BETTER than ever. Many stupendous features have been added under the direction of James Smart, chairman of the Stampede parade, Alex Ross, vice-chairman, and Harry Hutchcroft, in charge of all details. Over 50,000 people witness this great annual event. Indians in picturesque native dress, hundreds of cowboys and cowgirls riding prancing horses and aboard their chuck wagons. Huge balloons depicting animals and comedy figures will provide the feature attraction along with over 1,200 horses and Mounted Police.

Another added attraction for the parade is being arranged by President J. Chas Yule, which will include the different breeds of cattle and sheep mounted in trucks. All classes of horses will also be paraded in a special section.

Stampede

The Stampede proper will take place every afternoon in front of the grandstand. Between five and six hundred entries, including many of the world's greatest riders, will participate. Perhaps the most thrilling feature of the Stampede will be the trials for the Canadian and North American bucking horse championships, followed by wild steer riding, wild cow milking, steer and calf roping contests. Each and every event will hold the audience spell-bound. The wild steer decorating contests always win rounds of approval, as well as the Indian Races that are run each evening.

Chuck Wagon Races

No matter how many times you have witnessed these thrilling races, they always put you on the edge of your seat with excitement. To see these wagons race around the track at breakneck speed is a thrill that you'll remember the rest of your life.

Brilliant Grandstand Performance

The "REVUE INTERNATIONALE" is the title of the stupendous grandstand performance to be presented before the evening audience. It's a grand, colorful musical extravaganza featuring a combination of outstanding acts with some of the cleverest vaudeville stars and performers in existence. Another great attraction billed is the FIREWORKS Monday and Saturday nights. This display is the largest single night's show in Canada.

Brilliant Colorful Midway

The midway this year is larger and grander than ever. Two great trainloads of new rides . . . new settings . . . new lighting effects will lend the carnival atmosphere to the show.

Seven Days' Racing

This year the horse-racing meet opens Saturday, July 9th, and will continue Monday to Saturday, July 16th. Seven races will be run off each day. Some of the continent's famous thoroughbreds will be here for the meet.

Items of Interest

A six-year-old boy playing with a gun he did not know was loaded shot his eight-year-old sister in the barn of their farm in the Craig district, 20 miles west of Innisfail, on Friday morning at 8:30 o'clock. The dead girl is Hedwick Anna Gret Haupt. The gun was in the hands of her small brother, Carl. But for the fact that the girl had passed her examination and did not have to go back to school until the end of the summer holidays, the fatality might not have happened.

W. C. Wells, contractor at Wilkie, Sask., has had his tender accepted for construction of a \$25,000 breakwater at the end of main street at Sylvan Lake. This was revealed by H. R. Farnsworth, president of the Sylvan Lake Property Owners' Association, who received word from P. J. A. Cardin, deputy minister of public works at Ottawa. Work on the project is expected to start this fall. It is hoped later to have the pier suitably lighted.

Saskatchewan voters shoved 445,731 votes into ballot boxes June 8th and marked up a new record for the total vote in provincial elections. The 1938 total vote exceeded that of 1934 by 16,581. In 1934 voters cast 428,880 votes. Total for 1938 does not include the relatively small vote of the northern ridings, which do not poll until July 28th. But the total for 1934 does include the north riding vote. Vote in the north is too small to cause a great deal of difference, it being usually between 2,000 and 3,000.

Jay Walkers Fined in Calgary.

Mrs. Jean Watson and Mrs. Lillian Ethridge were sentenced to fines of \$8 in the Calgary police court Friday for failing to proceed in the direction of moving traffic at the intersection of Eighth avenue and First street west.

UP GOES POWER --- DOWN COME COSTS

WORLD HAPPENINGS
BRIEFLY TOLD

A resolution asking that a percentage of vacancies in English schools for anti-aircraft training be reserved for war veterans was passed at the British Legion conference.

Britain, United States and several European countries are expected to send representatives to the international canoe championships to be held in Vaxholm, Sweden, Aug. 6 and 7.

Robert Perkins, airman M.P. for Stroud, England, released a pigeon at Westminster, motored to Heston and flew 100 miles to his home. The pigeon was home first—by a minute.

Sir James MacBrien, former commissioner of the Royal Canadian Mounted Police, who died March 5, left an estate of \$35,331, according to his will filed for probate.

United States congress has been asked to add \$700,000 to the \$2,834,517 already available for control of grasshoppers and other pests as the original amount was not enough.

T. Eaton Company (Western) Ltd., will construct an \$800,000 departmental store this year in Edmonton. It was announced at Calgary. The tentative plans call for a two-storey and basement building.

Sir Edward Deny Bacon, 77, one of the world's foremost stamp authorities and supervisor of the magnificent collection of King George V, died recently at his home in South Croydon.

Establishment of a diploma course in aerial navigation was announced by the University of Toronto. Honor matriculation will be necessary for admission to the two-year course, which begins Oct. 1.

Pensions for former members of parliament and their widows will be provided under a bill the British government is expected to introduce shortly. A pension of £3 (\$15) weekly for ex-members and 30 shillings (\$6) for widows is proposed.

A COOL, BREEZY, YOUNG FROCK
By Anne Adams

Styles may come and styles may go, but the "swing skirt" frock seems to go on forever... as far as the young set is concerned. It's the very type of dress to make a girl in her teens and twenties feel especially graceful and alluring. Here, in Pattern 4722, Anne Adams has given an exciting lift to the waistline, a perkiness to the brief, ruffled sleeves, a soft and flattering treatment to bodice and neckline that makes this the perfect little frock for summer! The best fabric for it? A dainty all-over printed voile, a chiffon, or a printed silk crepe.

Pattern 4722 is available in misses' sizes 12, 14, 16, 18 and 20. Size 16 takes 3 3/4 yards 39 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Sounding Rocket

New Style Of Parachute To Bring Rocket Safely Back To Earth

A new art in parachuting has been developed in the desert in New Mexico to bring safely back to earth the great sounding rocket of Prof. H. Goddard of Clark University.

The early rocket ships usually destroyed themselves by falling to the earth after they had ascended a mile or more. This new ship comes down gently with a parachute.

The Goddard rocket is 18 feet long, about a foot in diameter, made of aluminum painted black, and capped with a shining conical head. It weighs only 84 pounds after its flaming oxygen-gasoline tail which drives it up is exhausted. At this point the cap opens and two parachutes come out. A small one carries meteorological instruments sent up with the rocket. A large parachute with a spread of 10 feet is for the rocket's descent.

The speeds which this pioneer rocket ship has developed run up to 700 miles an hour.

Educational Research

Organization Of Canadian Council Will Be Recommended

Organization of a Canadian Council for Educational Research will be recommended to the biennial conference of the Canadian Educational Association in Halifax, August 15, by a five-man committee appointed to study the problem of national research in education in Canada.

It was announced the committee, headed by Dr. H. F. Munro, president of the C.E.A., met in Toronto to draft its recommendations. It was appointed at the biennial conference of the C.E.A. in Regina.

On the proposed research council, it was announced, will be one representative from British Columbia; three from the prairie provinces; four from the Quebec-Ontario area; four from the Maritimes and three co-opted members.

Julius Caesar was very punctilious in regard to the management of his household, and once put his baker in irons for serving him with one kind of bread and his guests with another.

These are times when a man needs a new hat but does without it. However, it's different with his wife.

Thousand Islands Bridge

International Ceremonies To Be Held On Opening On August 18th

Governor Lehman of New York has accepted an invitation to attend the opening on Aug. 18 of the new Thousand Islands International bridge.

A delegation composed of Vice-Chairman Frank J. Martin of the Thousand Islands Bridge Authority, State Senator Perley A. Pitcher and Assemblyman Russell Wright presented him with the formal invitation, and the Governor said "yes" then and there.

President Roosevelt has conditionally accepted a similar invitation, and Prime Minister Mackenzie King of Canada has made full acceptance. Other leading officials of the Federal and Canadian governments, New York State and the Province of Ontario will attend the international ceremonies dedicating the new \$3,000,000 bridge system and celebrating the century of peace and good will between the U.S. and Canada.

Consisting of five separate spans and over eight miles of approaches and connecting roadways, the Thousand Islands International Bridge will cross the St. Lawrence river and scenic Thousand Islands from Collins Landing, N.Y., between Clayton and Alexandria Bay, to Ivy Lea, Ont., near Gananoque.

Good Man For Job

New Commander-In-Chief At Gibraltar Must Be Obeyed

General Sir W. Edmund Ironside, who is to succeed General Sir Charles Harrington as Governor and Commander-in-Chief at Gibraltar, is a big man in inches, a stern disciplinarian, a linguist, and has eyes which can make any man quail.

The artillery defences of Gibraltar, seaward and landward, are vital. In the changed Spanish conditions Great Britain needs a first-class artilleryman at "Gib."

General Ironside learnt foreign language, like the famous explorer Burton did. He put down on a postcard a list of words every day and memorized them. Thus he built up a vocabulary by short and intense concentration.—News of the World.

Discovery of two new seams of rich coal at Bemish, Eng., will provide 20 years' work for 1,000 men and boys.

Has To Be Tested

Electric Furnace Determines How Much Steel Will Stretch

Westinghouse research engineers have put finishing touches to the third of a battery of electric furnaces in which steel molecules became so hot and "tired" they stretch like so much taffy.

Before the metal part can be safely installed in a modern high-speed machine such as a steam turbine, engineers must know exactly how much it will stretch, or "creep," under working conditions. And in order to test, for example, the creep of metal parts in such a turbine, whose failure at a crucial moment might plunge an entire community into darkness, elaborate metal apparatus has been built at East Pittsburgh.

The steam inside a turbine generator is so hot (at 850 degrees Fahrenheit) that the steel interior glows a dull red. The blades which turn the armature shaft are bathed in this tremendous heat as the steam forces them around. Under the combined action of centrifugal force, steam impact and high temperature, the grains in the metal slide and the blades "creep." It is to test such steel parts for "creep" down to a few thousandths of an inch that new equipment was built.—St. Thomas Times-Journal.

A Brave Judge

Insisted On Women Removing Their Hats In Jury Box

According to the Guelph Mercury it remained for Supreme Court Justice Abram Zoller of New York state to get ten women to remove their hats at the same time. True, the action was achieved by a stern court decree, but it was brave just the same.

Presiding at the trial of a damage suit in White Plains, N.Y., the justice announced that hats could not be worn in the jury box in his courtroom—not even by women. There were ten women jurors.

The judge explained that litigation was a pretty important matter and that the women shouldn't get the idea they were invited to a social function when asked to serve on a jury. What made the judge especially irate was the time when one young woman went home at noon and came back with an entire new ensemble for the afternoon session.

The judge's ideas are entirely sensible. Jury duty is serious business and ought to be taken in dead earnestness—and no fretting about how that new off-the-face model is impressing the handsome young prosecutor.

Fulfilled Early Promise

Sir Joseph Thomson One Child Prodigy Who Made Good

Youthful prodigies do not always bear out their early promise, but that certainly cannot be said of Sir J. J. Thomson, Master of Trinity College, Cambridge, to whom the coveted Kelvin Medal has been awarded for his eminent services to engineering science.

Sir Joseph entered Owens College, Manchester, at the age of 14, to take the engineering course. The event caused such a stir that the age limit was immediately raised!

But the boy quickly proved his worth, and since then 20 universities have presented him with degrees, 11 learned societies with fellowships, nine others with medals.

He was one of the original holders of the Order of Merit, and he won the Nobel Prize for Physics 32 years ago—a record of distinction that is probably unique.—News of the World.

Has Plenty Of Cheese

Germany Urges People To Eat More And Keep Well

"Eat cheese and keep well," the German Government suggested—with small effects. Floats loaded with cheeses from the most pungent limburger to the mildest cream wound their odoriferous way through Berlin's residential streets with the "eat cheese" banners. Cheese is one of the few things of which there is a glut on the German market.

"Nobody can deny my love for you, sweetheart."

"I'd like to see anybody try. I've kept all your letters." 2259

Health LEAGUE of CANADA
presents
TOPICS of VITAL INTEREST

Eskimos Make Long Trip

Accompany Priest From Chesterfield Inlet To Quebec Congress

After travelling more than 1,950 miles by dog train and railway, three Eskimos from the oblate mission at Chesterfield Inlet reached Montreal on the Continental Limited of the Canadian National Railways, on their way to Quebec, delegates to the Eucharistic Congress. They were accompanied by Rev. Father L. Ducharme, O.M.I.; the eldest of the group is Alphonse Kollitslerk, 35, who bellies his name "The Fat One". John Ayaruar (Strong Pusher) is 27. He supplies the missionaries with caribou, seals, white whales and fish when he is at home in the Arctic, and on the 450-mile journey on the ice along the shore of Hudson Bay he hunted seals to feed the 19 dogs that carried the party on the first stage of its first trip to civilization. The third party is Simon, John's little seven-year-old son.

Speaking neither English nor French, the Eskimos gave their impressions of their rail journey and this part of the world through Father Ducharme, who speaks their tongue fluently. What surprised them most, they said, was the size of the buildings and the trees and their journey in the train, never having seen an engine bigger than an outboard motor, they were overawed by the great locomotive and appreciated the opportunity given them by the train crew to visit the engineer's cab. They described their berths as "moving igloos."

Given his first taste of ice cream in the diner, Simon asked "Why is it cold? You can have things hot here, can't you?" When hot tea followed the ice cream, the Eskimos laughed merrily at the weird logic of the white man.

On their arrival in Montreal, they attended mass in the Bishop's private chapel and were not at all surprised to hear chants in the Eskimo language on phonograph records.

The memorable journey began on April 28. The train was boarded at Churchill. The Eskimos will return to the Arctic by boat in July.

Indian Origin More Likely

Anticosti Comes From Word Meaning "Where Bears Are Hunted"

Anticosti, the island so much discussed at present, was called Assomption by Jacques Cartier when he first sighted it in 1534, and Ascension by a later explorer, but within the next hundred years had become generally known as Anticosti, from, it is said, an Indian word Naticousti, meaning "where bears are hunted." Derivation from Spanish words "before the coast" has been suggested, but the Indian origin is more likely.—Toronto Star.

Not A Dependent

Bachelor Found Income Tax Deduction Not Allowed For Housekeeper

Add income tax oddities: A bachelor in Providence, R.I., who employed a housekeeper, thought he could deduct the \$4 a week he paid her plus the price of a new bed and bed spring he bought her "because she threatened to quit if I didn't."

The U.S. Government ruled the housekeeper was earning her livelihood and couldn't be classed as a dependent under the law.

Kind words are never lost—but they are frequently mislaid.

TRUE STORIES
OF CHEMISTRY IN EVERYDAY LIFE

BY DR. H. G. LITTLER.

"Rubber" Made from Limestone, Coal and Salt

One of the most important materials supplied to us by nature is rubber, sometimes called "Black Gold" because of its commercial value. First brought to the attention of the civilized world by Columbus, who found the natives of Haiti playing with a rubber ball, this material is now used for literally thousands of purposes and is the basis of an industry which does a billion-dollar business annually.

While hundreds of different trees, weeds and vines contain rubber, none equals in quality and quantity that obtained from the milky juice of the Hevea tree, native to the equatorial jungles of Brazil. In spite of the fact that the Hevea tree is now cultivated in various tropical countries other than Brazil, the market price of rubber sometimes reaches such a level as to disturb the rubber industry—and the public as well. In addition, several important industrial nations do not own any land suitable for the production of rubber.

As a result of this situation, chemists throughout the world during the past fifty years have spent many millions of dollars trying to make synthetic rubber. Although chemists have not yet succeeded in the commercial manufacture of a product identical with that obtained from the Hevea tree, they have done better. Using four of nature's own raw materials, limestone, coal, salt and water, chemists are now making a product known as neoprene which looks like rubber, acts like rubber, and can be used in the manufacture of practically all articles for which rubber is now used.

The chemical story, briefly told, is as follows: Coal and limestone heated together in an electric furnace give calcium carbide, which, on the addition of water, gives acetylene gas. This part of the story is familiar to some of the oldsters who used

"carbide" headlights on their bicycles and automobiles some years ago. Acetylene plus a material known to the chemist as a catalyst gives another gas known as monovinylacetylene. The latter, plus hydrochloric acid (made from salt), gives a liquid

(Photo, Canadian Industries Limited)

Washing Man-Made Neoprene

called chloroprene, and the union or intermarriage of chloroprene molecules gives the new rubber-like neoprene.

Although tough and elastic like rubber, neoprene is chemically different, and because of this difference it does not fear rubber's age-old enemies—gasoline, oils, chemicals, oxygen, sunlight and heat. This man-made product is accordingly not a rubber substitute, but is used for a variety of purposes for which rubber is not well suited, including the manufacture of gasoline and fuel oil hose, printing rollers, electrical cables, and acid-resistant gloves. And although neoprene costs more per pound than rubber, certain articles made from neoprene are actually cheaper than corresponding rubber articles, because of their longer life under severe service conditions. Neoprene also offers the assurance of an excellent substitute in the event of the supply of natural rubber being curtailed or cut off entirely.

The Coleman Self-Heating Iron

Lights Instantly • Quick Heating

Turn a valve, strike a match and the Coleman is ready for use in a jiffy. Entire ironing surface is heated with point the hottest. No cords or connections. Can be used anywhere. Saves 1/3 ironing time. See the Coleman Dealer near you or write for facts!

RICHARD CONNELL

By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER XIII.

Fate, in the form of a bus, made up Ernest Bingley's mind for him. It stopped in front of him and he swung aboard it. Whither it was bound he knew not. One of the compensations of poverty is that adventure is not the exclusive prerogative of the rich.

"Where to, sir?" asked the guard. "I'm going wherever you're going," answered Ernest. The guard gave him an alarmed look, and a tenpenny ticket, and scuttled away.

At the end of the run Ernest got off. Confronting him was a massive structure, which, a bobby informed him, was the Bank of England. Ernest was wistfully inspecting the exterior of this monument to Mammon, when Sir Peter Tyler, a most substantial and resplendent figure, issued forth.

"Bingley, by Jove," he exclaimed. "What a bit of luck. Glad to see you."

"How do you do, Sir Peter," said Ernest.

"Splendidly, thanks. I rather thought you'd be in town to-day."

"You did?" said a surprised Ernest.

"One finds bees where honey is," said Sir Peter, and winked. "Shall we go in my car or yours?"

"Yours," said Ernest.

A free ride was a free ride, and Sir Peter was Sir Peter.

They entered a limousine like a fancy hearse.

"Club, Willets," ordered the financier.

They were ferried through the Strand's traffic and delivered at the door of a marble temple in Pall Mall.

Sir Peter talked of his golf game, en route. Ernest lolled on the cushions and listened though he did not know a brassie from a birdie.

In the impressive lobby of the club a door-man rigged out in the dress uniform of a field marshal in Albanian dragoons, said,

"They are waiting for you in the private dining room on the third floor, Sir Peter."

"Good," said Sir Peter. Then, to Ernest, as they rose in the lift, "Too bad our friend cannot be with us. Passport trouble, I believe."

This was so much pure Erse to Ernest.

But he had no chance to ask questions because things began to happen, and happen fast.

Sir Peter steered him into a room where three men were smoking and drinking coffee as if they were holding a wake over the remains of a luncheon. They were men in their

middle years, well-turned-out, important looking men.

They greeted Sir Peter as if he were an old acquaintance.

"Permit me to introduce Mr. Ernest Bingley, from America," said Sir Peter. "You've heard me speak of him, I think. Mr. Bingley, this is Dr. Hendrik Van Tromp—the Dutch group, you know."

Dr. Van Tromp, who looked like a Dutch group, having a figure like a pile of bolsters, made a quasi-military salute.

"Mr. Miles Silver."

Mr. Silver, who looked as if he should have been called Mr. Leather for he was tanned as a saddle, and looked as tough as a check-rein, said he was honored.

"And Sir Mark Newsome."

Sir Mark, whose spike of ebon beard and anthracite eyes suggested a hypnotist, said,

"Most awfully glad to meet you at last, Mr. Bingley."

Ernest made suitable civil sounds, and waited.

The four men, he was aware, were scrutinizing him closely. The thought struck Ernest that this might be a commission of alienists assigned to ascertain if his being at large constituted a threat to the peace of the kingdom. He crossed his legs and made ready to have his knee-jerks tested.

Sir Peter addressed the meeting.

"Gentlemen," he said, "I suggest we cut this short. I've a pressing engagement, and when I tell you that it involves a niblick and a caddie, you will see why we should waste no time."

"Also, I haff a golf game," said Dr. Van Tromp.

"And I," said Miles Silver.

"Booked to fly to Biarritz this afternoon myself," said Sir Mark Newsome.

"Let's get down to it, then," said Sir Peter.

Ernest thought it rather cool of them to run him through the hopper in a hurry so they could get away to play; but he said nothing, and decided to adopt a policy of silence and thus avoid any verbal traps they might set for him.

"We all know what we are here for," said Sir Peter.

"And we have a pretty good idea of what Mr. Bingley is here for," said Mr. Silver, and his smile, somehow, made Ernest think of a tom-cat he had once caught raiding the canary department of his pet-shop.

Ernest sat back wearing the sage and solemn look of a mortician. A nugget of wisdom from his reading came back to him—that dictum of some early statesman—"when in doubt, keep your mouth shut and your eyes open and look wise."

"Are there any questions you'd like to ask, Mr. Bingley?" said Sir Peter.

Ernest made a barely visible, negative shake of his head.

"Mr. Bingley," said Sir Peter to the others, "always makes a careful and thorough study of anything before he commits himself. Am I not right, Mr. Bingley?"

Ernest nodded.

"To our muttons, then," said Sir Peter. "We'll hear first from the gentleman from Rotterdam. What do you say, Dr. Van Tromp?"

"One," said Dr. Van Tromp, just that, nothing more.

Sir Peter looked pained. He pointed at Mr. Silver.

"Two," said Mr. Silver.

"Three," said Mr. Mark Newsome, and blew a smoke-ring.

They all eyed Ernest expectantly. They saw a face as wooden and expressionless as a hickory two-by-four.

"Well, Mr. Bingley, will you say 'four'?" said Sir Peter in a satin voice.

Ernest maintained a stolid silence. "Come, come," cajoled Sir Peter, "do say 'four'. Will you?"

Ernest nodded. He did not see how any harm could come to him for being polite and playing this game, whatever it was. It might be a mental test, he reasoned, though the theory that it was an English version of the match game business men play to see who will pay for the lunch, occurred to Ernest.

It was Dr. Van Tromp's turn next, and after a moment of deep Dutch reflection he said,

"Four and a quarter."

"Four and a half," said Mr. Silver.

"Four and three quarters," said Sir Mark.

They waited for Ernest's move.

"It's up to you, Mr. Bingley," Sir

THE WILSON FLY PAD CO., HAMILTON, ONT.

Peter said, "I expect you to say 'five', you know."

Ernest did not say it.

"Am I to understand that you say 'five'?" asked Sir Peter.

Ernest nodded.

"Five it is, then," said Sir Peter, and seemed pleased. "What do you say, Dr. Van Tromp?"

"Nudding," said Van Tromp.

"Can you better five, Silver?"

Mr. Silver said he could not.

"How about you, Sir Mark?"

"I'm most excruciatingly sorry," said Sir Mark, "but five beats my best. Mr. Bingley has too much artillery on his side. I lower my boom to our friend from across the Atlantic."

"That," said Sir Peter, with a satisfied air, "just about winds up the old clock, I think. Unless," he added, "one of you gentlemen wishes to lock horns with Mr. Bingley."

To Ernest's relief nobody seemed to want to lock horns with him.

"You win, Mr. Bingley," Sir Peter said, and shook his hand. "You've made no mistake, believe me."

The others also shook Ernest's hand, and they did not seem much chagrined over their defeat. He tucked his cloak of silence tighter about him and waited for the prize.

"I must dash along now," Sir Peter said. "Sorry to seem so cavalier, but golf is golf, what? You don't really need me. Just drop into my office, Tyler House, Lombard street, and my junior partner, Mr. Armstrong, will take care of you. He knows the details and I'll phone him to be expecting you."

Ernest nodded, cheered by the thought that he was about to escape with his nine shillings and his pocket of pudding intact. He sensed now that this was no innocent game, but some complicated, mysterious commercial manoeuvre in which they had made him, for reasons known to them, a pawn.

The four important looking men were filing out of the room and Ernest was filing out with them, when their exodus was stopped by a man who burst into the room as if his shirt-tails were on fire.

It was Hubert Punder and to say Mr. Punder was hot is to say that molten lava is like chocolate ice cream. Mr. Punder generated heat in every direction.

"Hah!" he snorted. "Hah!"

"Why, Punder?" exclaimed Sir Peter. "What do you mean by breaking into a private meeting and going 'Hah!' at us?"

"Private meeting? Hah! Private swindle!" bellowed Punder.

"Watch your words, Punder," rapped out Sir Peter.

"I'd like to know what's happened here," Punder said.

"Ask Mr. Bingley."

"Hah!" said Punder, turning a venomous glare on Ernest. "Have you closed with these wolves?"

"He has," said Sir Peter, "and a little less of that wolf talk, if you don't mind."

"How much?" growled Punder.

Sir Mark answered for Ernest.

"Five," he said.

"Hah!" It was an outraged "Hah!"

"If 'Hah!' is all you have to say,

we'll adjourn the meeting," said Sir Peter.

"No, you won't," said Punder. "I got plenty to say. I know your little game. I got spies, too. Trying to juggle me out of P.P.P., hey?"

"I was not aware you wanted P.P.P.," averred Sir Peter.

"You thought nobody wanted it," said Punder. "You knew that without reorganization and a lot of fresh capital it was going on the rocks—so you and these three beauties baited your hooks—and went fishing. Well, you caught a fine flounder, I must say."

It was entirely clear to Ernest that he was the flounder.

(To Be Continued)

Things We Value

Are Those Which Have Cost Many Sacrifices To Attain

It seems to be a favorite form of advertising to urge that a certain article can be paid for without some pet luxury. How often we read that a set of books can be purchased for the price of two good cigars a day; that a bicycle can be paid for in the saving of car tickets.

The idea is to appeal to the economic impulse that every man has more or less in his make-up.

And what articles are prized more than those for which it is necessary to make some sacrifice? The husband and wife who have saved for a home little by little, and who have found it necessary to drop pleasures and extras that they had been accustomed to, will prize the place much more than if some rich aunt had died and willed them the property.

The young man who saves his first hundred dollars from his earnings will never forget the day when he saw three figures on the sunny side of his bank book.

When advertisers appeal to that instinct in human nature, they are on legitimate and safe ground. The things we value most highly in life are the ones that have cost something to attain.—Guelph Mercury.

Write Long Letters

Laborers On Malay Estates Use Special Lightweight Paper

Native Indian laborers working on estates in Malay write such long letters home that a special lightweight paper has had to be manufactured for them.

Need for such paper was caused by the introduction of the Empire air mail system. The estate workers did not fully understand the weight restrictions and merely continued to send page upon page home to India, where their relations had to pay additional postage. The relations objected.

Estate employers solved the problem for their workmen. They ordered from London large quantities of a specially made flimsy paper, which they distributed free among the laborers.

And since 11 sheets of this paper can be crammed into an envelope without going over the half-ounce-for-a-penny-halfpenny limit, the Indian workers in Malay can now get ahead with their writing. But even they are probably not as grateful as their wives and parents back in India.

Now Restaurant Doorman

Former Royal Chauffeur Receives Weekly Salary Of Sixty Cents

George Ladbroke, former King Edward VIII's chauffeur, now has a salary of two shillings sixpence (60 cents) a week as doorman of a Mayfair restaurant.

With his family he once lived in a spacious apartment in Buckingham Palace. Now he is in a tiny flat in Kennington.

Out of his small salary one shilling and seven pence meets health and unemployment insurances, leaving him a total of 11 pence. However he averages £3 (\$15) a week in tips and receives £2 a week Government pension for his service to the former King.

It took Walter Hunt of New York just three hours to think up the safety pin, make a model of it and dispose of his patent rights for \$400. But he'd have made a fortune if he hadn't sold out.

Poland, we read, is joining in the search for a peace formula. How about the Golden Rule? 2259

WRIGLEY'S SPEARMINT GUM
is fine for
teeth

Dentists recommend Wrigley's Gum as an aid to strong, healthy teeth, cleanses them of food particles, massages the gums. Aids digestion, relieves stuffy feeling after meals. **Helps keep you healthy!** Take some home for the children too—they will love it! CS-33

Fought Chinese Bandits

Missionary Found Athletic Training Stood Him In Good Stead

Stirring tale of battles with Chinese bandits were related by Rev. Father J. J. McDonald, who was in Toronto on his way to Windsor, N.S., on furlough after eight years as a missionary in Lichiu, Chekiang province. Father McDonald is the son of Windsor's chief of police and a graduate of St. Francis Xavier, where he played football and boxed.

Father McDonald's athletic experience came in handy at his mission post. He said that the father of a little girl at Lichiu sold her to another old man for \$200 and she was to become the wife of the son of the purchaser, but when she grew up she didn't want to marry the man. Since she had become a Christian, Father McDonald advised her not to go through with the bargain that started the trouble.

Brigands turned up at the home of the girl's father, where the missionary was staying at the time, and Father McDonald had an idea they were after himself. "No doubt that's the reason I put up such a battle," he said.

The missionary led other men of the household in a hand-to-hand struggle with the invaders and after the fracas was over the bandits fled to the hills, carrying their wounded.

Germ Warfare

Says Noxious Germs Will Not Be Used In Future Wars

Noxious germs will not be scattered from the skies in a future war, according to Wing-Commander E. J. Hodsoll, inspector-general of air raid precautions. Bacteriological warfare is impossible, he told a meeting of sanitary inspectors in London. It was not feasible to drop "bugs" from the air.

"They do not take very kindly to being compressed and thrown about," said Commander Hodsoll. "It would be necessary to introduce the 'bug' into the system, and short of supplying each of them with a small knife to make a hole when he arrived, it could not be done."

In the presence of moisture, cracks in concrete heal so tightly that the concrete may be stronger than before.

Another good resolution for the summer season is to learn to swim.

Burnside Notes

Mrs. William McCulloch spent a couple of days last week with her daughter, Mrs. Walter Fulkert.

Mr. and Mrs. Harold Metz of Midnapore spent the week end with the former's father, Mr. George Metz.

Miss Tena McLean, of the staff of the Mental Hospital at Ponoka, spent the week end with her father, Mr. Hugh McLean, and other relatives here.

Lone Pine W.I. will meet at the home of Mrs. Jack Garner on Tuesday, July 5th, instead of the 6th as planned.

Mr. and Mrs. Glen Fulkert and family spent Sunday with Mr. and Mrs. Jim McCulloch.

Mrs. Kate Saunders and daughter Julia, of Calgary, are visiting relatives here.

Mr. and Mrs. W. Lyons spent Sunday with Mr. and Mrs. E. R. Dawson at Sunnyslope.

Mrs. Peter Schumaker, who has been quite ill in the Didsbury Hospital, is improving and has returned to her home here.

Melvin Notes.

Mr. and Mrs. Carlson and Mr. and Mrs. Dupont drove to Drumheller on Friday.

Mrs. P. Daniels and baby spent a few days this week with her parents, Mr. and Mrs. G. Carlson.

Mrs. Landeen's niece from Calgary is spending a few days with the Landeens.

A number from this community are leaving to-day for the Sundre Stampede.

Didsbury and Melvin played at baseball at Melvin on Wednesday evening. Although the score was one sided, the game was enjoyed by both player and spectator, the score being 8-0 for Melvin.

Melvin and Water Valley played a very interesting game of ball on Sunday. Owing to rain only eight innings were played, Melvin being defeated with a score of 5-4.

Melvin Sports and Ball Tournament will be held on July 6th. Big Dance at night with Calgary Hill-Billy Orchestra.

BIRTHS

Didsbury General Hospital.

June 15: to Mr. and Mrs. Joe Davidson, a son.

WEEKLY JOKE

Preacher: "Do you say you prayers at night, little boy?"

Jimmy: "Yes, sir."

Preacher: "And do you always say them in the morning, too?"

Jimmy: "No, sir. I ain't scared in the daytime."

LOCAL & GENERAL

Mr. Ralph Hansen of the Didsbury Creamery, spent the weekend with his parents at Edmonton.

The wicket at the post office will be open from 11 a.m. to 12 noon tomorrow (Dominion Day), which is a public holiday.

A meeting of the Fish and Game Association will be held on Tuesday July 5th. All members are asked to attend.

Mr. and Mrs. T. A. Murphy and son Clifford left Monday for a motor trip to Kansas returning via Oregon and British Columbia.

\$1.00 will buy five pairs of dress socks at Scott's.

Mrs. Russell Ady of the Bright Spot, who was visiting relatives at Dauphin, Manitoba, returned home on Saturday.

Eddy Watkin has finished his trailer and they say its a dandy. He had it out on a trial run to Olds last week.

Mrs. A. H. Foote spent the weekend at Banff with her son Delmar, who is engaged at that resort for the summer.

Wednesday, July 6th, is the date of Carstairs Stampede. Many big riders will be there getting in shape for the big Calgary event the following week.

Mrs. W. T. Pitt was a winner of the Sunkist Radio Limerick Contest last week and was awarded a box of Sunkist Oranges. We saw her distributing her winnings to her friends.

K. Roy McLean, Optometrist and Optician, 209-210 Southam Bldg., Calgary, announcing his next visit to Didsbury.—Monday morning, July 4th at Rosebud Hotel. (252)

From "Minnie the Moocher" to Schubert's "Serenade" she's tops in her newest gayest picture.—Grace Moore in "When You're In Love," at the movies this weekend.

N. Nowak is attending the convention of the Western Association of the Deaf which is being held at Calgary this week. Trips to Banff and Turner Valley will be included in the convention program.

T. Johnson, H. Morgan, A. Brusso and J. A. McGhee took part in the Scottish Rite golf tournament at Red Deer on Wednesday last. It is reported that Morgan broke the record of the course.

For best values in men's work clothing—go to Scott's.

Mrs. Charles Youngs leaves tonight for a prolonged visit to her old home in Ontario. She will be accompanied by Mrs. George Youngs who will visit her old home in Nova Scotia.

The Knox United Church Sunday School picnic will be held at Bruce Parker's grove on Wednesday, July 6th. Cars will leave the church at 2 p.m., and members and friends of the church are heartily welcome. Please bring lunch basket. Coffee and lemonade will be supplied.

Mr. and Mrs. J. A. McGhee went to Maple Creek, Sask., on Sunday to attend a banquet in honor of Mr. S. A. Thom, who has been station agent at that point for over thirty years and is now retiring. Previous to that time Mr. Thom was station agent at Innisfail.

Word has been received that Douglas Wordie passed his Toronto Conservatory of Music examination Grade 6 with first-class honours, and that Gordon Wordie passed his Toronto Conservatory of Music exam Grade 2 with honours. Douglas is a pupil of Mrs. R. A. Gulliver, while Gordon is a pupil of Miss Eileen Geeson.

In compliment to Mrs. John Field of Aruba, Dutch West Indies, Mrs. F. A. Elves entertained at a small tea yesterday afternoon when Mrs. E. M. Doyle presided at the tea table and the hostess was assisted by Mrs. Field's mother, Mrs. Frank Leeson of Didsbury. Mr. and Mrs. Field, who are spending the weekend in Calgary, will return to Didsbury on Sunday and will leave by motor on Wednesday for New York on their return home.—Calgary Herald.

How about summer footwear for your boys? Scampers from \$1.75 up at T. E. Scott's.

LOCAL & GENERAL

Mr. and Mrs. A. A. Thomas and family leave this weekend to spend their vacation at Milk River.

Miss Norma Sanderman has moved her beauty shop from the Ladies Shoppe to Room 5 in the Leuszler Block.

Mr. J. A. McGhee received word of the death of his aunt Mrs. Archie Fead who passed away at Penhold on Tuesday.

Miss Doris Friesen, who has completed her course in beauty culture at the Jacobson Beauty Academy, Calgary, will open a beauty parlor at the Ladies' Shoppe on Saturday July 2nd.

Miss Evelyn McGhee who is in training at St. Joseph's Hospital at Victoria, B.C., came home for her summer vacation on Wednesday. She was accompanied by her friend, Miss Mabel Weberg.

Special sale of ladies summer dresses. Regular up to \$4.95 for \$2.95.—Didsbury Ladies' Shop.

The Didsbury Junior Board of Trade will hold its next general meeting Thursday evening, July 7th, in the Legion Hall at 8:30. All those between the ages of 18 and 40 who are interested in the welfare of the community are cordially invited to attend and join this organization.

Mr. and Mrs. John L. Field of Aruba, Netherlands West Indies, who have been guests of Mrs. Fields' parents, Mr. and Mrs. F. W. Leeson, for the past two weeks, left Wednesday morning to motor to New York on their return home, sailing for Aruba in July.

Gun Club Notes.

The regular bi-weekly shoot was held Monday night when Fred Aastrup was presented with the Turvey Cup for 1937.

The evening's scores were:

J. Chamberlain	22 out of 25
J. Caithness	20 "
H. Hansen	20 "
R. Ady	19 "
E. Watkin	18 "
K. McCoy	14 "
F. Aastrup	13 "
I. L. Klein	13 "

The largest crowd ever attending, over 50 were present.

At the Movies.

Grace Moore's Newest Musical—"When You're In Love"

Grace Moore's newest picture, one that is said to surpass even her highly popular "One Night of Love," comes to the Opera House this weekend. Its title is "When You're In Love" and, as usual, was produced by Columbia.

Cary Grant joins the ranks of the opera star's leading men for this film. Tullio Carminati, Leo Carrillo, Robert Allen and Franchot Tone have preceded him as recipients of Miss Moore's favor on the screen. This also marks the first occasion that Grant has appeared in a musical picture.

Story values, which somehow are often neglected in the making of musical films, were stressed in the production of "When You're In Love," it is reported. This is evidenced by the fact that none other than Robert Riskin, noted writer, penned Miss Moore's latest story. Riskin also makes his bow as director with this film.

Scout and Cub Corner.
